

- 1 Remove all the **debris** from the **pump** and **weir baskets**.
- 2 Unplug the **pool cleaner**.
- 3 Brush the **walls** of the pool, especially **affected areas**.
- 4 Backwash the **filter** thoroughly.
- 5 Balance the **pH** to 7.4.
- 6 Add 1 bag **Sudden Shock** for every 25,000 litres.
- 7 Add 625ml **Green Out** for every 25,000 litres.
- 8 Run **pump** as normal and **monitor filter pressure**. Backwash as needed.
- 9 When clear - **top up pool** and plug in **pool cleaner**.

Bring a sample of water back so we can check on the water balance

Use **Filter Cleanse** to clean the sand after algae blooms!
